Author Index

ASHTON, P. J. and WALMSLEY, R. D. The aquatic fern *Azolla* and its *Anabaena* symbiont. 39.

BROWN, A. F. Seeing with sound. 123.

CARR, D. J. *See* CARR, S. G. M.

CARR, S. G. M. and CARR, D. J. The French contribution to the discovery of Australia and its flora. 21.

EDITORIAL

A famous hypothesis. 2.

A landmark in telecommunications. 50.

The new ENDEAVOUR: a message from Sir Rowland Wright, Chairman of ICI. 98.

GREENHALGH, C. W. Aspects of anthraquinone dyestuff chemistry. 134.

HALL, C. F., MARK, H., and WOLFE, J. H. The journey to Jupiter. 9.

HESLOP-HARRISON, Y. Carnivorous plants a century after Darwin. 114.

HUKINS, D. W. L. *See* WOODHEAD-GALLOWAY, J.

KAY, R. H. The hearing of complicated sounds. 104.

LEGGETT, A. J. The new phases of ^{3}He. 83.

McKILLOP, A. and TAYLOR, E. C. Thallium (III) nitrate in organic synthesis. 88.

MARK, H. *See* HALL, C. F.

MASON, B. J. The nature and prediction of climatic changes. 51.

MASSEY, H. S. W. Optical absorption by negative ions—photodetachment. 58.

MURRAY, K. Biochemical manipulation of genes. 129.

PROTA, G. and THOMSON, R. H. Melanin pigmentation in mammals. 32.

SAUNDERS, R. S. The geology and geophysics of Mars. 15.

SCHEVING, L. E. The dimension of time in biology and medicine—chronobiology. 66.

SCRUTTON, R. A. Fragments of the Earth's continental lithosphere. 99.

SHREEVE, J. M. Fluorinated peroxides. 79.

SHUTT, D. A. The effects of plant oestrogens on animal reproduction. 110.

TAYLOR, E. C. *See* McKILLOP, A.

THOMSON, R. H. *See* PROTA, G.

WAGNER, G. A. Radiation damage dating of rocks and artifacts. 3.

WALMSLEY, R. D. *See* ASHTON, P. J.

WISCHNITZER, S. The lampbrush chromosomes: their morphology and physiological importance. 27.

WOLFE, J. H. *See* HALL, C. F.

WOODHEAD-GALLOWAY, J. and HUKINS, D. W. L. Molecular biology of cartilage. 73.

Subject Index

General Science

The new ENDEAVOUR: a message from Sir Rowland Wright, Chairman of ICI (Editorial). 98.

Astronomy

The journey to Jupiter. Hall, C. F., Mark, H., and Wolfe, J. H. 9.

Physics

Seeing with sound. Brown, A. F. 123.

The hearing of complicated sounds. Kay, R. H. 104.

Optical absorption by negative ions—photodetachment. Massey, H. S. W. 58.

The new phases of ^{3}He. Leggett, A. J. 83.

Chemistry

A famous hypothesis (Editorial). 2.

Fluorinated peroxides. Shreeve, J. M. 79.

Thallium (III) nitrate in organic synthesis. McKillop, A. and Taylor, E. C. 88.

Aspects of anthraquinone dyestuff chemistry. Greenhalgh, C. W. 134.

Geophysics. Geology

The nature and prediction of climatic changes. Mason, B. J. 51.

Fragments of the Earth's continental lithosphere. Scrutton, R. A. 99.

Radiation damage dating of rocks and artifacts. Wagner, G. A. 3.

The geology and geophysics of Mars. Saunders, R. S. 15.

Biology

The dimension of time in biology and medicine—chronobiology. Scheving, L. E. 66.

Biochemical manipulation of genes. Murray, K. 129.

The lampbrush chromosomes: their morphology and physiological importance. Wischnitzer, S. 27.

Molecular biology of cartilage. Woodhead-Galloway, J. and Hukins, D. W. L. 73.

Biochemistry

The effects of plant oestrogens on animal reproduction. Shutt, D. A. 110.

Melanin pigmentation in mammals. Prota, G. and Thomson, R. H. 32.

Botany

The aquatic fern *Azolla* and its *Anabaena* symbiont. Ashton, P. J. and Walmsley, R. D. 39.

Carnivorous plants a century after Darwin. Heslop-Harrison, Y. 114.

History of Science

The French contribution to the discovery of Australia and its flora. Carr, S. G. M. and Carr, D. J. 21.

A landmark in telecommunications (Editorial). 50.
